ABOUT US

SECURE HOUSE PRODUCTS ARE ABOUT KEEPING ASSETS, PROPERTY AND PEOPLE SAFE.

At Secure House we're all about keeping people, property and assets safe.
With over 15 years experience, we class ourselves as market leaders in our industry and our comprehensive professional capabilities and extensive product selection reflect this.

We offer only the very highest quality security doors, up to ballistic certification levels, for use within a wide variety of both residential and commercial architectural projects.

Our unique product range and customer service includes:
- Fire rated doors up to 120 minutes
- 1.0u thermal value doors for eco homes
- Embassy fit doors
- Deposit protection
- Finance options for commercial clients
- Focus on exceeding client expectations

We are also the sole UK distributor of Skydas doors, combining our individual skills and two decades of experience to form a strong partnership to offer the most sophisticated steel security doors available on the market.

At Secure House, when it comes to delivering bespoke levels of security we really do have a door to suit every project and every budget. There's no compromise on aesthetics either, since all of our doors are designed to further enhance any structural opening and building.

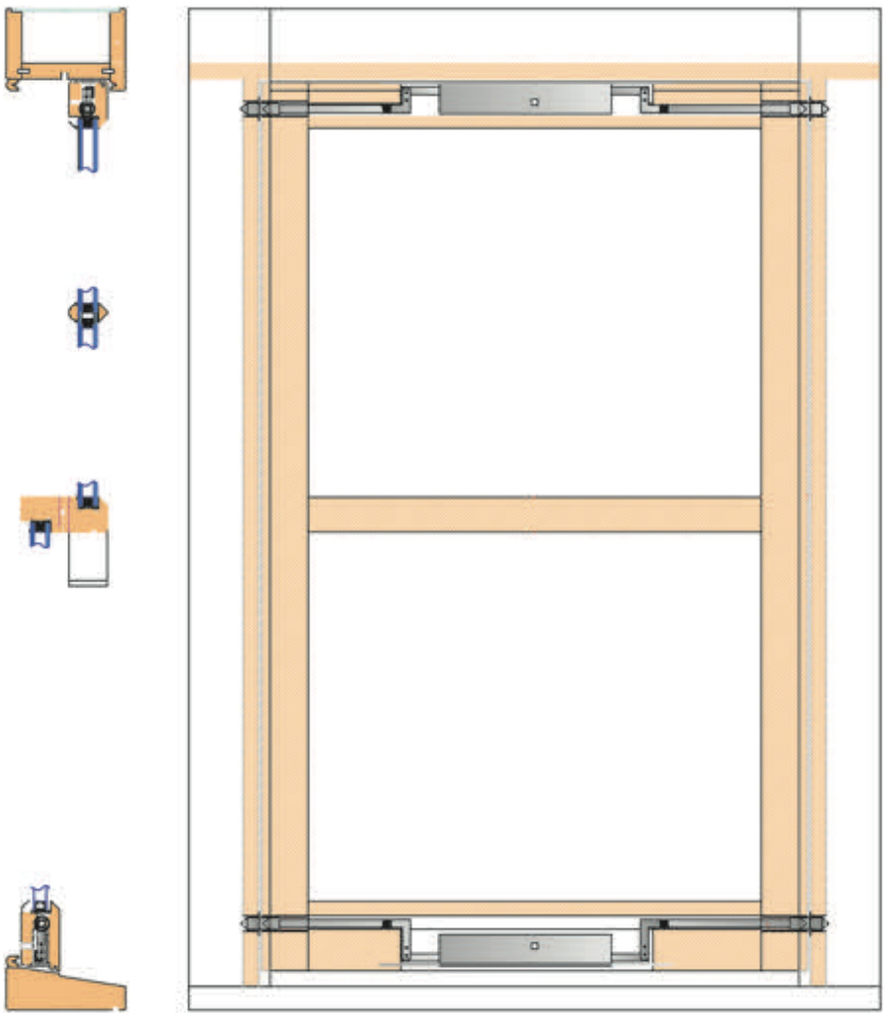
SECURITY WOODEN SASH WINDOWS



KEY FEATURES:

- A wide choice of security laminated glass according to EN 356
- Our production is as environmentally friendly;
- TEKNOS – is an environmentally friendly water-based paint;
- All wood supply from forests that are 100% replanted and has FSC certification;
- Double-glazed windows are new with selective coating, which allows you to conserve warmth and energy.

Our windows are made by combining many years of experience, traditions and new technologies.What allows us to maintain a very high quality and constantly improve in this area. Our production team mobilized from the masters with more than 10 years experience in the manufacture of wooden windows. We produce box sashes and spring sashes.

ALUMINIUM

WINDOWS

Windows characterise the appearance and form of projects perhaps more than any other component. Here, the name Schueco stands for sophisticated, proven system technology combined with a variety of materials, design and application options.

KEY FEATURES:

- Sophisticated system technology
- Highly thermally insulated windows allow energy saving
- Security
- Noise reduction
- Choice of colours
- Screening and solar shading systems
- Large range of fittings, glazing beads and handles offers scope for creativity

SLIDING AND FOLDING DOORS

Folding / sliding doors from Schüco are impressive on account of their versatility. As transparent transitions or discreet room dividers, they add emphasis in indoor areas – or they create generous gateways to the outside. Features, design and technology are, of course, at the highest level, and offer everything you could wish for.

KEY FEATURES:

- Wide range of shapes and designs
- Large areas of glass
- Easy to operate
- High insulation and security technology
- Special external and internal series
- Compatible with the Schüco world of systems
- Wide choice of colours

GARAGE DOORS

MODERN AND ELEGANT LOOK AND HIGH PERFORMANCE.

KEY FEATURES:

- R40 Sectional – the most popular garage door model
- TL Sectional – the best solution for double size doors
- SHD Side Hinged Doors – good old fashion doors
- SSD Side Sliding Doors – All panel designs can be used.

TRACKLESS GARAGE DOORS

ALUMINIUM SHUTTERS

External roller shutters are a practical system that pro- tects us in three ways: through a perfect insulation, the protection of our privacy and the peace of mind while pro - viding an effective “anti-burglar barrier”.

KEY FEATURES:

- Made from carefully selected materials to en - sure the highest quality
- Roller shutters are designed to improve the building en- ergy use.
- Roller shutters can greatly help reduce heat - ing costs Reduces the need & consumption of additional cooling equipment.
- Roller shutters provide effective protection against in- truders
- They protect rooms from the sun’s rays.
- prevents the room or interior from over-heat - ing external blinds are far more ef cient than ordinary cur- tains or shutters

KEY FEATURES OF OUR SECURITY METAL GATES:

- Bespoke design of sliding gates, swing gates and fencing
- Elegant and robust steel gates that has been pre-treated for corrosion resistance
- Concreting works for gate grounding, concrete wall for the fence, poles concreting.
- We work with top of the line “nice” automatic control equipment.
- Risk assessments according to BS en12100 up on re- quest
- Remote gates service via GSM controllers
- Warranties and after-sales service.

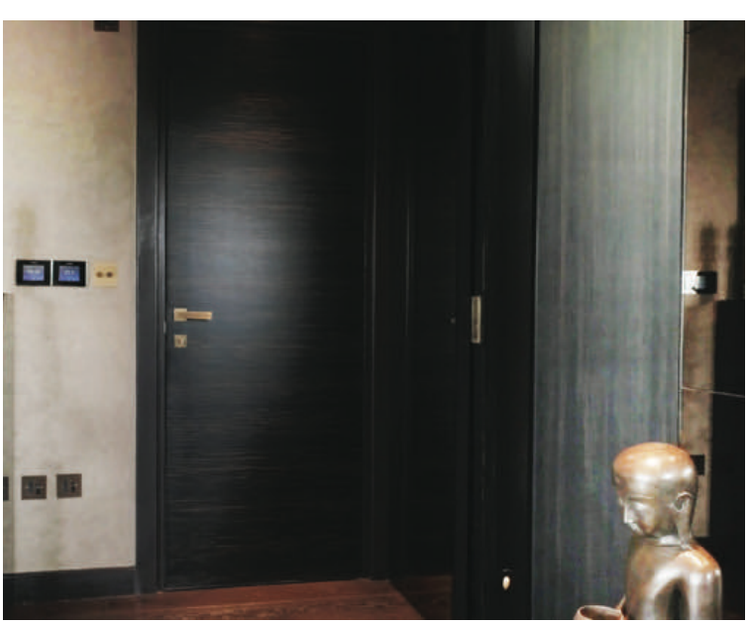
• All wood supply from forests that are 100% replanted and has FSc certi cation
• Choice of colours
• Double-glazed windows are new with selective coating, which allows you to conserve warmth and energy.



INTERNAL DOORS

INTRUDER ALARMS, CCTV AND ACCESS CONTROL SYSTEMS

A security alarm is a system designed to detect intrusion – unauthorized entry – into a building or area. Security alarms are used in residential, commercial, industrial, and military properties for protection against burglary (theft) or property damage, as well as personal protection against intruders

Some alarm systems serve a single purpose of burglary protection; combination systems provide both fire and intrusion protection. Intrusion alarm systems may also be combined with closed-circuit television surveillance systems to automatically record the activities of intruders, and may interface to access control systems for electrically locked doors. Systems range from small, self-contained noisemakers, to complicated, multi-area systems with computer monitoring and control.
